DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 27 recites the limitation "said first terminal part and said second terminal part". There is insufficient antecedent basis for this limitation in the claim. It is unclear whether the Applicant is claiming the terminal parts of the implant or a vertebra.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuntz (4,349,921). Kuntz discloses a method of treating a patient having a spinal deformitive, said method comprising: selecting a spinal stainless steel implant (col. 7, lines 51-56) having an elongated body, said body defining a longitudinal axis and having an upper surface and a lower surface wherein the first upper surface and the second lower surface are arcuate along the longitudinal axis and wherein said implant includes a first bearing surface adapted to bear against a portion of the first cortical bone endplate proximate to the first peripheral wall and an opposite second bearing surface

adapted to bear against the second cortical bone endplate proximate to the second peripheral wall; and surgically implanting the implant between the first vertebra and the second vertebra (Fig. 4).
